

CAELI COMMUNITY-BASED PARTNER HUB

Benefits of The Hub

Community-based partners (CBPs) with a presence on the Hub will have the opportunity to highlight how their offerings meet K-12 school system needs by connecting them to environmental topics and identifying key links to California's standards and Environmental Principles & Concepts (EP&Cs). The Hub will increase visibility and access to environmental education community-based partners and be a reliable central repository for districts, schools, and teachers to identify programs that align with their local needs and meet educational standards.

Key Features for Environmental Education Community-Based Partners

Access Students and
 Schools across CA

Highlight Program Features
 and Alignment

Join a Network of
 Partners and LEAs

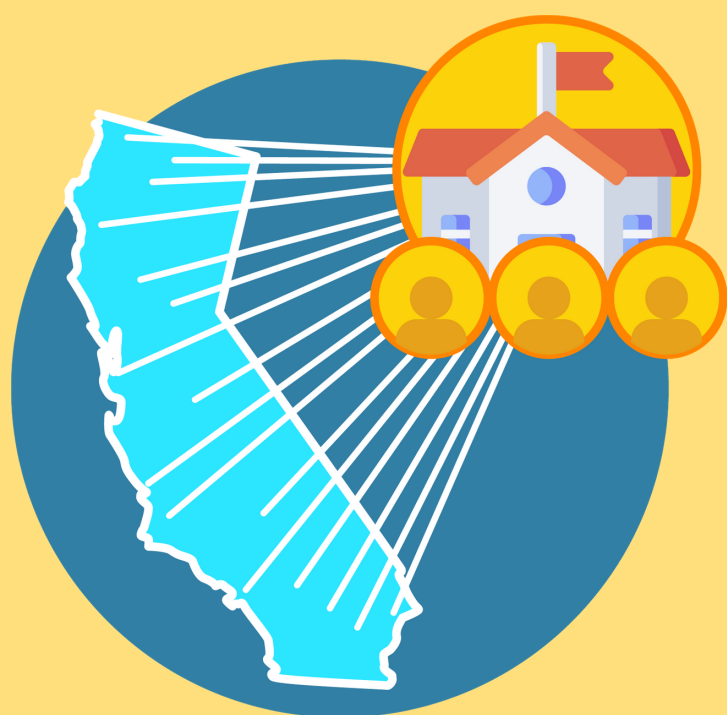

"The CAELI Community-Based Partner Hub will make it easier for teachers, schools, and districts to find high quality environmental education learning opportunities for their students and provide equitable access to important content and skills."

 COMMUNITY-BASED PARTNER**

Benefits for All Stakeholders

- Increase Equitable Access to Environmental Literacy Programs
- Support Capacity Building for Administrators and Teachers
- Create Connections Between the Formal and Nonformal Education Sectors

SB 720 directs state leaders to "assist in building and supporting partnerships and regional and statewide networks of public and private agencies and organizations, including county offices of education, school districts, and private partners, such as not-for-profit organizations, and community-based education providers that support the advancement of environmental literacy in California."
